

Stateful set

- [Refer Here](#) for official docs
- [Refer Here](#) for the changes done
- For the commands and execution watch classroom recording

Ingress

- [Refer Here](#) for official docs
- Important Objects
 - ingress:
 - We define rules for routing
 - ingressController
 - implements the rules
 - In k8s there is no default ingress controller
 - [Refer Here](#) for list of controller
- Ingresscontroller
 - nginx ingress controller (almost in any k8s cluster)
 - azure:
 - application gateway ingress controller (layer 7 lb of azure)
 - aws:
 - application loadbalancer ingress controller (layer 7 lb of aws)

- Now we will create two docker images

- preschool (/preschool)
- skate board (/skate) [Refer Here](#)
