

Azure DevOps Tasks

- Tasks are most widely used to express steps in pipeline
- Tasks list [Refer Here](#)
- Basic Pipeline

- Tasks are wrapped in jobs or stages according to needs of parallelism and organizing.
- Listed Tasks or jobs or stages can be made reusable with the help of templates
- Pipeline activities

Presented with xmind

- Next Steps
 - Self Hosted Agent
 - Building:
 - java
 - dotnet
 - docker
 - Deploying:
