

AWS Systems Manager

- Overview

- [Refer Here](#) for official docs

- Lets create one windows and one linux instance

- Now lets set up systems manager

- Refer classroom video for ec2 instance setup and using

- sessions manager
- inventory
- run commands
- patch manager

- [Refer Here](#) for manually installing and configuring ssm agent and [Refer Here](#) for linux instances for ssm agent installation

- For all popular ami's SSM agent is already installed
